There are many advantages a well executed painting can have over a photograph.

The greatest benefit is the ability of the artist to reduce or eliminate unwanted details and cosmetic flaws, then concentrate and elaborate on all of those subtleties that make up the very soul of the being or subject.

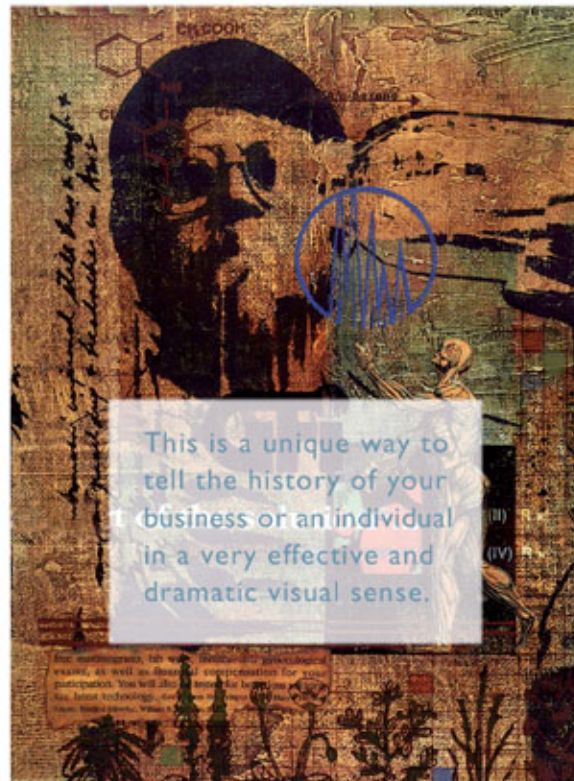

My style of painting varies from sketchy or impressionistic to realistic depending on the subject, my mood or perhaps the art direction of my client. Sketches or paintings can be done according to size and medium to meet your budget. The mediums I utilize are pen & ink, pastel, watercolor and oil. I also offer matting and framing.

This is a unique way to tell the history of your business or an individual in a very effective and dramatic visual sense.

I have many years of experience and specialize in color matching, repairing cracks and fissures that run through faces and rebuilding surfaces where paint has flecked off of paintings and statuary.
